25 YEARS OF INNOVATION

In 2017, Avionica celebrates 25 years in business.
We thank the many customers who put their trust
in a small Miami-based avionics company that has quietly
made a big impact on the industry.

With Avionica's **miniQAR, Onboard Network Server (ONS),
Remote Data Concentrator (RDC), 4G Wireless GSE Module,
WiFi** or **avSYNC** service that automatically downloads
flight data to a land-based server, Avionica has helped aviation
transition to e-Enablement and connectivity for the cockpit.

We take pride in our products,
service and customer support.

The best is still to come.
