

Benefits of Easy Installation

Easy Installation of Avionica Data Recording Equipment

Safety of an aircraft is always a high priority for an airline or operator. Monitoring of the aircraft safety data can be a tedious, costly, and labor-intensive process, which needs constant monitoring, analysis, and expertise.

Challenges - *Need for lightweight, reliable, and secure, immediate transfer of data*

The major Challenges faced by Airlines, Corporate & Business Jet Owners to accomplish these are:

- Need for Easy and Quick Installation of QARs
- Customized Service for Certification and Installation
- To have access to flight data within minutes of landing

Avionica Data Recording Equipment

miniQAR MKIII / avCM

aviONS (Modular + Cellular)

Modular, Light-weight and easy to install

Benefits of Easy Installation

Turnkey Solution with Easy Installation

Avionica assists the operators to achieve the benefits sooner. Avionica designs our products with installation and support in mind. The aircraft is not making money when it is down for maintenance. Controlling our own STCs, modular designs that allow flexible installation locations and phased implementations, and minimizing the installation kits all allow for reduced down times. This is equally true for new installations or retrofit/replacement options.

	Benefits of Installing Avionica Data Recording Equipment	
Value	<ul style="list-style-type: none"> ▪ Get FDM, FOQA and Safety services-initiated ASAP ▪ Customized data packages if needed ▪ Brand new installs as easy as two wires, power and A717 ▪ Minimal install kit ▪ Lowest total cost of ownership 	\$
Installation	<ul style="list-style-type: none"> ▪ In house Engineering – Customized and Collaborative team support ▪ Customized Installation - Designed with installation in mind ▪ Modular designs allow flexible install configurations for retrofit ▪ 24/7/365 Support – Seamless Offering 	
Turnkey Offering	<ul style="list-style-type: none"> ▪ Easy plug and play replacement/upgrade options for competitor's products, including cellular data transmission options <ul style="list-style-type: none"> • No wire installs in many cases • No kits • Installs in minutes, less than two hours including paperwork and Ground Test Procedures for wireless • Seamless Offering
